Abstract. Modern in society person intellectual potential role more and more increased happening: its development and at the personal and individual level maximum level made increase opportunity in the end all society level necessary and important existence remains. This event target respectively society constant modernization

Introduction. Today's on the day of High knowing Human And specialist's effective activity Social system development give takes. Civilization type change, society development change higher education in content changes and updates cause releases. Specialists Preparation quality, trainable Sciences selection, training method and student funds private qualities, knowledge, skills and qualification the score is the same depend high education content constant modified standing society and economy requirements reply provision specialty model Job go out based on High education majority important task - adult specialist This is Totalization. that's two bilaterally process: one on the other hand, humanity Job came out special selected scientific knowledge and activity methods transmission of infection and assimilation; second taken from the side knowledge and information perception do critical teach. In this sense education all humanity existence the basis is socio -economic reforms basic tool existence service does. Therefore, education only humanity and democratic traditions destructive education services field How seeing this won't happen. High professional education own task student intellectual and professional potential form purposeful Effect show through each other With depends on was three process: personnel preparation, culture transmission of infection And Scientific research activity through made increases [4]. High professional in education competence based an approach apply his content, structure, methods and to radical changes in forms take comes [5].

First at the undergraduate stage of the university education program original Preparation provides and students person, society, culture, history O scientific knowledge system appropriation opportunity gives; basic natural Sciences Preparation And professional knowledge basics takes. Condition education standard according to, humanitarian and socio-economic Sciences All specialties in bachelor's degree reading is defined as the state. « Future specialist Preparation quality and efficiency Not only high professional perhaps professional activities sociocultural context definition ability own V received social, psychological, cultural, individual and private competencies existence with is estimated. responsibility, independence, activity, group skills, communication skills team activity. [6, p. 212].

Professional activity for necessary was competencies formation one How many from the stage passes and three level made increases:

1. Border level activity type, professional activity objects activities basic laws, practical Problems solution do methods and algorithms O general imagination gives

2. Basic degree ordinary Problems solution do, known algorithms, rules and methods professional and control solutions Adoption do give an opportunity gives

www.wordlyknowledge.uz Volume: 1, Issue: 2, 2023

3. Advanced degree grow going by complexity practical problems, non-standard tasks solution does, complete Did not happen accuracy in conditions, documentary, normative and methodical help absence with professional and control solutions Adoption do readiness means.

In the University reading Not only future bachelors competence model formation is possible they are received knowledge affect quality do needed. Today in a day University graduate be placed requirements good theoretical and practical training, qualified professional position and own knowledge others learn and deliver ability own V takes. Psychological and pedagogical Sciences block education informative processes, activities psychology. group (social) psychology, human communications psychology in field knowledge forms And Human check receive ability Enhance help gives people psychological and private their characteristics informative and professional activity styles. Modern bachelor's professional in preparation society And Human socio-economic changes item How all imagination Who sociological education important role plays Sociological research skills and sociological to tools have be in future Job For necessary was information skilled collect results commenting, social Problems definition and solution do give an opportunity gives [6].

So, expert modern model high level professionalism, social activity and responsibility, thinking and solutions Adoption in progress independence, activity intellectual and creative team approach Job skills and team manage ability in itself bring enough.
