FACTORS OF COMPREHENSIVE EDUCATION OF PRESCHOOL CHILDREN

Annotation: This thesis sheds light on the work that needs to be done for the comprehensive development of children educated in preschool educational institutions.

Introduction: The analyses carried out in the preschool education system show that children not only grow up healthy, but also acquire knowledge that contributes to becoming a mature person in the future, education that meets the requirements of the time there is a need to find a solution to the issues of provision of methodical manuals and literature, the inclusion of qualified pedagogues and personnel in the field of preschool education.

Main body: The issues of further improvement of this system were thoroughly studied, and the goal was to develop public-private partnership in preschool education. According to the decision of the President of the Republic of Uzbekistan dated September 30, 2018 “On measures to improve the management of the preschool education system” No. PD-3955:

- further improvement of the regulatory framework in the field of preschool education;
- creating conditions for comprehensive development of preschool children;
- increase coverage of children with quality preschool education;
- introducing innovations into the preschool education system;
- improvement of preschool education management system.

After the establishment of the Ministry of Preschool Education, a lot of work was carried out on the effective organization of the preschool education system. The decision of the President of the Republic of Uzbekistan dated May 8, 2019 No. PD-4312 “On approval of the concept of development of the preschool education system

of the Republic of Uzbekistan until 2030" aimed at developing the preschool education system Education contributes to healthy and mature adulthood.

The concept aimed at the development of education defines the tasks, goals, stages, and priorities for the further development of preschool education organizations in our republic in the medium and long term. In addition, this concept is the basis for the development of state programs and complex measures aimed at the development of the sector. The main goal of the concept is to develop mechanisms for the use of preschool education that ensure the development of all spheres of the life and activities of children [1].

The concept aimed at the development of education makes a great contribution to the education of children of preschool age, because based on the concept, a favorable environment is created for the growth of intellectual potential, morally and physically in all areas of development. Revision of education and training processes in organizations based on re-improvement in accordance with the needs of the time is necessary to create conditions aimed at comprehensive development of preschool children.

Children's physical, linguistic, creative, emotional, personal and social development, as well as their readiness for school, should be evaluated as a starting point for improving the nutrition and education process. During this process, priority should be given to preschool children's passion for their Motherland, ability to feel it, respect for family, friends, country, environment, history and values.

In accordance with the decision of the President of the Republic of Uzbekistan No. PD-4857 dated October 8, 2020, it should be additionally noted that the introduction of modern information and communication technologies and advanced pedagogy, which greatly contribute to the development of education in the field is one of the priority directions. According to it, organizing the preparation and publication of a new generation of educational and teaching-methodical literature, introducing digital educational resources, distance education from home and technologies for

improving parents' knowledge; the task of carrying out scientific research in the field of early development of preschool children, integrating advanced scientific developments and technologies into the activities of preschool educational organizations[2] was assigned.

In the preschool education system, there are state requirements that ensure the comprehensive development of children from infancy to preschool age. According to the order of the Minister of Preschool Education of the Republic of Uzbekistan No. 1 dated June 18, 2018, state requirements for the development of primary and preschool children of the Republic of Uzbekistan were introduced[3].

These state requirements for the development of primary and preschool children of the Republic of Uzbekistan are the Law of the Republic of Uzbekistan "On Education", the President of the Republic of Uzbekistan dated December 29, 2016 No. PD-2707 "Resolution of the Cabinet of Ministers dated November 21, 2017 No. 929", "On measures to further improve the preschool education system in 2017-2021" and "On the approval of the charter of the Institute for the retraining of leaders and specialists of pre-school educational institutions and their professional development" defines the requirements [3].

The purpose of the state requirements[3] is the purpose of the preschool education system, taking into account the latest socio-economic reforms implemented in our country, best practices of other countries, achievements in the field of science and advanced information and communication technologies is to help the development of the education system. State requirements are implemented based on the following principles (Figure 1) [3]:

The purpose, tasks and principles of the state requirements integrate the comprehensive development of the child and help the child to grow up.

Conclusion: In conclusion, preschool educational organizations are responsible for the development of children in all aspects, especially physically, spiritually and socially. Laws and decisions adopted by our country are also of great service to children's education and health.
