THE ROLE OF "DEVELOPMENT STRATEGY" IN THE DEVELOPMENT OF PRESCHOOL EDUCATION

Shuhrat Sharofovich Hamroyev
senior teacher of the "Social Sciences" department of the institute for retraining and professional development of directors and specialists of pre-school educational organizations

Annotation: This article analyzes the actual work carried out in the field of education, especially in the field of preschool education, on the development path set by the head of our state in reforming preschool education.
Key words: Social protection, development, strategy, patriotism, national pride, education, preschool education.

"Our youth in the spirit of Motherland and national pride
education is the most important task"

In terms of reforming the national economy, effective measures to liberalize foreign trade, tax and financial policy, support entrepreneurship and guarantee the inviolability of private property, organize deep processing of agricultural products and ensure rapid development of regions was seen.

Strengthening the social protection of citizens and reducing poverty is defined as the priority of the state policy, and providing the population with new jobs and a guaranteed source of income, qualified medical and educational services, and decent living conditions has reached a new level in terms of quality was raised.

As a result of the reforms of the last five years, the necessary political-legal, socio-economic and scientific-educational foundations for the establishment of New Uzbekistan were created in our country.

All the cities and villages of our Republic are carrying out great creativity and creativity based on humanitarian ideas.

You will be satisfied that all the facilities and opportunities have been created for our youth, who are the successors of our tomorrow living in a free and prosperous country. Because the material and spiritual expenses spent on children and young people are soon paying off. We all understand well that the good work done for the education of children and youth is a guarantee of our peace and well-being.

Protecting and strengthening peace and security, harmony and solidarity between citizens and nations in Uzbekistan should be our most important and decisive task from now on. Of course, there are relevant agencies responsible for this issue, and we have enough power. But when will the country be peaceful and prosperous? This goal can be achieved only when the person living in every house, every neighborhood realizes the value of peace and tranquility, considers it his duty to strengthen and protect it, and fight for peace.

While the process of globalization continues with drastic changes in human life, there is a struggle for the human mind and soul, and the attack of various harmful ideas that poison the minds and minds of our youth, entering from the West as elements of mass culture, is intensifying. At such a time, it is self-evident that young people, who are in the stage of all-round formation and growth, remain the object of this struggle. Educating our youth in the spirit of patriotism and national pride, protecting them from the negative effects and consequences of the globalization process, is the most important task before all of us today.

At this point, if we express some opinions based on the responsibility of the task set before us, this will be a small share of the general work. Because the harmony of thoughts, the generalization of worldviews governs life.

In the "Development Strategy" of the development of Uzbekistan in 2022-2026, by supporting public-private partnerships in the field of preschool education, in order to ensure wide coverage of children with preschool education, the President of the Republic of Uzbekistan "Preschool Education "Resolution on measures to further develop public-private partnership in the field of transport" was signed. According to the decision, the establishment of preschool educational institutions on the basis of public-private partnership across the republic was encouraged, and it was decided to allocate long-term and preferential loans to entrepreneurs by attracting preferential loans from commercial banks and international financial institutions.

The results of scientific research confirmed that a person acquires about 70% of all the information and data that he acquires during his lifetime by the age of 5. This factor determines the importance of preschool education as the main link of the unified system of continuous education.

However, before the beginning of the new stage of reforms in Uzbekistan, special attention was not paid to preschool education. By 2017, the situation has completely changed. In particular, in accordance with the decree "On measures to fundamentally improve the management of the preschool education system" and the decision "On the organization of the activities of the Ministry of preschool education of the Republic of Uzbekistan", the Ministry of preschool education was established.

The development of preschool education in both traditional and completely new forms has become one of the main priorities of the state. In particular, in 2017-2021, 96 normative legal documents - including 3 decrees and 19 presidential decrees, 44 decisions and 8 decrees of the Cabinet of Ministers, 13 departmental and 7 other decrees - were adopted in the Republic of Uzbekistan in order to fundamentally reform this sector. normative legal documents were adopted.

At the same time, in order to expand the network of preschool education organizations, strengthen their material and technical base, and build new kindergartens, the program for further improvement of the preschool education system in 2017-2021 and the level of coverage with preschool education until 2030 The concept of preschool education system development aimed at reaching 80.8% was approved.

As a result of the implemented reforms, the coverage level of children with preschool education increased from 27.7% to 72.4%, the number of MTTs increased from 5211 to 19316, the funds allocated from the budget increased by 3.7 times, and the salary of teachers of state preschool educational institutions increased to 668.4 an increase from one thousand soums to 1324.0 thousand soums was ensured.

Our achievements in all areas of our lives are the result of our striving for goodness, innovation, and goodness. Because this is the product of the higher thinking of a person's attitude to existence and life. At the same time, it is the biggest mistake to look at life with open eyes and not give in to crude imagination, to turn a blind eye to some unpleasant negative situations in the consciousness of our youth, considering that this is a temporary situation. It can be said that this is an unforgivable situation for a parent. Because there is no big or small situation in education. Any seemingly insignificant misunderstanding in upbringing can quickly become large and affect the ability of children and young people to live honestly. Our future is in the hands of a mature generation. Their success in studying and learning the secrets of the trade is our achievement.

The achievements achieved in the field of sports will definitely serve the public and help our children grow up to be healthier and more perfect people. Promotion of physical education and healthy lifestyle in families will give good results. We, parents and intellectuals, always and everywhere need our personal example, we should be an example with our rightful demands.

Ibrat training is a unique masterpiece of national pedagogy, and each pedagogue should set a personal example and example in the spiritual development of students. If teachers, educators, doctors, intellectuals, from their appearance to their behavior, can serve as an example to the student, pupil and student, then the pupil will not need to look for a spiritual ideal from outside.

A truly free and prosperous country depends on how important it is to ensure a prosperous life, education and upbringing of the young generation.

Our great grandfathers, scholars and thinkers Al Khorazmi, Abu Raikhan Beruni, Abu Ali, on organizing the educational process, educating children well from a young age, teaching them good manners and moral rules, and raising them to be educated and enlightened perfect people of their time. Ibn Sina, Alisher Nawai, Imam al-Bukhari, Ahmed Yassavi's works and personal examples are an incomparable educational school.

For example, in the book "Kutadgu-bilik" written by Yusuf Khos Hajib, which is an introduction to happiness, the rules of ethics and manners taught to young people, examples of education are commendable. The great philosopher, scientist and physician Ibn Sina did not say for nothing that the upbringing of a child should begin before it is born. Abu Nasir Farabi said that it is a great and honorable blessing to get education and education, that the actions and habits of adults are examples and examples for children. It is not for nothing that he mentioned in his work "The City of Virtuous People" that it is a great wisdom and blessing to leave to the generations.

While the current market economy is being formed, a new outlook is being formed on the basis of universal laws and principles based on the rules of world economic law. If we can reach the hearts of our children and young people, we will have done a great job.

The idea of national independence is this Prosperous and Free Motherland for all of us, and great goals such as the peace of the motherland, the well-being of the people, the flourishing of science and enlightenment, and the achievement of tolerance and perfection have been set as a task.

One of our most important tasks is to raise the quality of education of loyalty to the Motherland and national pride among children and young people in pre-school educational institutions and among children and youth in the implementation of the idea of national revival and national progress.
