**Key words:** Factors,Economic growth, Growth factors, Labor resource.

**Introduction**

As a result of the intensification of globalization among the countries of the world in recent years many countries have several hundred in relation to economic decline or foreign debt GDP there is an increasing number of countries that increase in size. However, these states are of these, China has the highest economic growth and the lowest foreign debt (13.7% GDP compared to) leading among the countries of the world. Therefore, the Chinese people let's dwell on the supports of economic growth of the democtarian Republic.

Great attention to the above factors in recent years in the Republic of Uzbekistan stare. For example, the volume of gross domestic product in the country at the end of 2022 nearly 888.4 trl [5]. The highest contribution from this is the network services and industry.

Development of the economy in our country as well as in the Republic of Uzbekistan balance on demand and supply, employment and unemployment and similar issues PF-60 of our president for storage "designed for 2022-2026 The decree "development strategy of Uzbekistan" was adopted. The Iiiiyonalar of this decree is" the rapid development of the national economy and the provision of high growth rates" was named and included the following objectives [3].

➢ Future by ensuring stable high growth rates in the sectors of the economy gross domestic product per capita in five years — 1.6 times and population as of 2030 increase per capita income from US $ 4,000 as well as " income to provide the ground for entry into the" above-average states " series.

➢ Ensure the stability of the national economy and share of industry in gross domestic product production of industrial products, continuing the industrial policy aimed at increasing increase in size by 1.4 times.

➢ Continuous supply of electricity to the economy and "green economy" active introduction of technologies to all sectors, energy efficiency of the economy 20 percent increase.

➢ Transform the digital economy into the main "driver" sphere, increasing its volume to at least 2.5 carrying out work aimed at increasing the level.

➢ Further improve the investment environment in the country and increase its attractiveness, in the next five years, 120 billion US dollars, including 70 billion foreign dollars taking measures to attract investment.

➢ In order to increase financial resources in the economy, the fund in the next 5 years bringing the market turnover from US $ 200 million to US $ 7 billion.

➢ Republican exports in 2026 by increasing the export potential of the Republic bringing the volumes to US $ 30 billion.

➢ Radical reform of Water Resources Management System and water economy implementation of a separate state program on.

➢ To 1.4 — 1.6 times the territorial economy through the proportional development of territories increase.

In conclusion, sustainable economic growth is the main goal of all states is. Therefore, all in society to carry out economic growth, education, health, sports, economics, international relations, tax system and the like it will be necessary to reform the sphere and networks in one whole.
