INDIVIDUAL METHODS IN TEACHING STUDENTS

Pulatov Bakhodir Abduraupovich

Teacher at Military education of

Fergama state university

Abstract

This in the thesis present time requirements answer giving teaching methods and methods illuminated.

Key words

Innovation, credit module, rating, technology.

To all of us known from the first years of our independence to education very big attention giving is coming. Our independence hand since we entered after the first our president IA Karimov led by education field fundamentally reform done To this simple one example as 12 years in our country free of charge education, academic lyceums, colleges free of charge way medium special specialists preparation system if we bring no doubt place won't stay Today's to the day come in our country take going education in the field from the big big reforms, innovations education system more to rise impulse be lib service is doing Myself study taking Ferghana state university in the example innovative systems, updates and reforms example in the style of will receive if we are, teaching method previous for years relatively new color received.

30 ha near developed countries (England, Japan, South Korea, Malaysia and etc.) education in the system successful being used pedagogical of technology the essence of it usual teaching methods difference doer aspects, Uzbekistan education to the system him current of reaching importance, test assignments forms, them make up and pedagogical of technology principles and rules, training materials work developed Independent knowledge in getting first of all, in students independent to work, free, creative activity to conduct and the most the main thing independent to thinking the need formation it is necessary Education in the process creative methods innovative technologies study to the process to apply has been interest, attention from the day to the day getting stronger going on, like this of being reasons one that's it until time traditional students only ready knowledge to take over taught if it is modern in technology while them occupying knowledge themselves looking for to find independent learn analysis to do error conclusions themselves cause to release teaches. Teacher this to the process of the person development, formation, knowledge get and to education conditions creates and that's it with one in line management, guidance function performs Education in the process student main to the figure becomes That's why for higher study countries qualified occupation owners in preparation modern teaching methods - interactive methods innovative technologies place and role life is big. In our country study taking students knowledge level increase they are own on more more their performance for today's in the day in our country credit,, module system " current done Credit module system, this is har one study module (Module is separate individual study science). The content to compose based on of the module study results and final

control watching to go through education of recipients knowledge, skill and competencies regularly respectively evaluate going study program appropriation process organize reach system is (3).

This is education system main aspects one This is the students independent work provide, their own on work ability formation if considered, secondly their occupied knowledge and skills rating based on evaluate to go

Uzbekistan Republic President of October 8, 2019 decree with confirmed " Uzbekistan Republic higher education system until 2030 development concept". according to in the country 85 percent of HEIs by 2030 step by step credit module to the system pass planned. It's close years during in the country almost all OTMs credit module in the system activity walk from the start a tree gives (1).

Credit module system main duties as the following confession will be :

— study processes module based on organize to do

— one subject, course (credit). value to determine

— students knowledge rating Bali based on assessment ;

— to students their own study plans individually to make possibility create ;

— education in the process independent education to get share increase _

— education programs convenience and work in the market to a specialist placed from demand come out change possibility. We to young people being created this of possibilities complete using our country the future for the development of this country for soul our joy with by reading knowledge take over To our president positive answer to return promise we give
