Abstract : Kidneys peloectasia urine system of the body pathological status being , then groin getting bigger to go observed . Same that's it condition baby and also available in adults . Most of the time pyeloectasia men and men genitourinary system bodies physiological features depends respectively effect does.

Key words : Symptoms , pyelelectasia , causes , treatment and prophylaxis .

This pathology what _ Its characteristics, types and what it has to do with such a diagnosis are described in more detail below.

Description and reasons

Kidneys are it harmful substances from the body take to throw for answer giving urine system main is an organ is a filter . Kidney the pelvis is of urine accumulation as a result appear has been kidney cups sum being , he later from the organism urine the way through is issued . And this on the ground many people question there is a kidney pyelectasis what _

Peloectasia - of the kidneys infectious lesion , abnormal structure of the kidney and others _ Due to diagnosis placed toss expansion .

Uterus in development born reasons :

- lumen , valve or work release narrowing ,
- Son the children to break shortening , this while of the penis the head Entirely open to put possibility does not give
- neurological diseases , his basically to pee of the process violation is formed
- kidneys pathological structure ,
- urine the way squeeze stands
- urine of the ways the walls formation and development in the process disorders ,
- of the urethra abnormal structure ,
- belly of the wall weakness ,
- blood rotation system interruption _

Received factors :

- hormonal balance

IMPACT FACTOR(SJIF) : 3,934

- endocrine system diseases in the background urine of size growth ,
- urine system inflammation ,
- kidney and another of organs infectious diseases , they of the organism poisoning and urine in the system load increase with together will come
- pelvis damage ,
- genitourinary system tumor formation ,
- nephroptosis ,
- salt accumulation and urine in the system stone formation in organs ,
- of the urethra in the lumen to decrease take coming diseases .

Classification of pyelelectasis

Depending on the source of the pathological structure of the kidneys, there are two forms: acquired and congenital. Congenital pathology develops against the background of the intrauterine artery to the development of the fetus. The resulting pathology causes mechanical damage to the internal organs of aging organs, helps to prevent the development of infections and inflammation in the body, and urination.

Pathological to the location according to the following is selected :

- right kidney pelelectasis ,
- left kidney pyeloectasia ,
- of the kidneys pyeloectasia .

Any disease _ shape three from the stage passes : middle , middle and heavy _ Medium and medium level pelectectia does not require treatment , but a urologist continuous monitoring _ need _ Of flow serious shape complicated requires resolution because _ _ urine to stop whole urine system to the violation take will come and kidney hydronephrosis take coming can _

Adult did not in patients this risk medium level intense two bilaterally Pyelecticia is considered This is one of time in itself both of the organ from being swallowed come it turns out that while excretion system to the violation take coming it is possible of a person common to the situation and all organs and of systems to work negative effect does _

Symptom and effect

Left and right bilaterally Pelelectasis medium and medium level getting stronger goes , becomes asymptomatic , this diagnostic the process complicates . Two bilaterally to pyeloectasia more sure symptomatic picture companion to be can _

IMPACT FACTOR(SJIF) : 3,934

- Kidney tissues little by little destroyed to be binder tissue of size increase with is described .

- Food size decrease and urine to leave bother doer harmful substances and of compounds little by little to accumulate take will come

- Kidneys inflammation of urine indestructible departure , decay products accumulation and in the body immunity of forces of resistance decline in the background develops .

- Kidneys shorten or reduce _

Older _ of pyelookecti manifestation to be :

1. of the urethra ectopic - urine of the ways structure violation , this on the ground urine of the ways in men and in women in the vagina use opportunity there is
2. Urethrocel - production release reduction and opening narrowing .
3. Urethra valves break _
4. Uretero-vesicular flow reflux him in release barriers there is when it was urine to the kidney to throw with is described .
5. A megawatt urine bladder in the background develops and it is urine bladder pressure increases .

Disease diagnosis

Kidney pathology can be diagnosed only by ultrasound, which shows the expansion of the pelvis. This method also makes it possible to determine the sizes, obstructions, inflammations and neoplasms in the urinary system, which lead to interruption of urination.

If renal pyelectomy is caused by inflammation or infectious diseases, the patient should undergo a complete examination, which includes:

- Excretor urography - ulnar vein introduction of contrast (urografin). with together x-ray . Urografin quickly absorbed , his 5 minutes from the introduction after in the urine is collected . Contrast harmful effect urine system status and function in detail to learn possibility gives _

- Histography endoscopic inspection type being , then urine release ways through video camera with equipped probe one to the bowl is entered . This method the walls and bladder situation to learn possibility gives _

- Radioisotopes scanning - malignant tumors , metastases determination enable giving research method . From this except , operation done before _ increased _ Of this for to the patient oncological in compounds collected special substances is entered .

Kidney cysts - causes and treatment

-

E-ISSN : 2181-4341
https://wordlyknowledge.uz
IMPACT FACTOR(SJIF) : 3,934

What because of and how does not require treatment , kidney A cyst is called a benign neoplasm . Briefly so to speak , this small in size one bag , his inside yellow colorful liquid there is Of the disease manifestation to be , usually too unpleasant and all Dangerous to things addition respectively , them quickly no to do need _

Cysts main reasons

Kidneys kidney is a disease very often occurs . Still , it's good not studied . None if not , today to the day come his main the reasons are a mystery remains _

Most of the time disease is congenital . But experts different injuries , infections and diseases because of appear has been right and left kidneys cysts with engage in need was _

name
Dangerous in the zone the following people available :

- tuberculosis sick ;
- Hypertension ;
- genitourinary system infections ;
- vegetative blood vein dystonia ;
- urolithiasis .

Cysts types and signs

Specialists three new kind of neoplasms separate show :

- Serous cysts is the " simplest " one .
- Hemorrhagic neoplasms between main the difference is blood veins liquid with on the cover appear will be
- Bubble cyst basically infectious inflammation in the background develops .

Of the disease signs always sure pronunciation not done . Such or such kidney of the cyst reason what from being strict Look at the reasons identification , treatment and unconsciousness done is not increased . And their all , people their own diagnoses about they don't know because of

A lot cases health status problem only neoplasm very big is another _ to organs pressure when spent begins . This stage main symptoms available :

1. kidneys volume increases ;
2. in the urine blood mixtures is determined ;
3. to pee painful will be
4. lumbar in the region discomfort available (physical exercises and heavy things raise as a result discomfort increases);
5. the body temperature rises ;

6. kidney hypertension there is
7. common weakness available ;
8. the patient quickly he gets tired .
